## Expectations from the course

As a Back-End developer, I have to occasionally deal with DevOps stuff. This autumn, I have planned to improve my knowledge of this area. In particular, I'm interested in learning about ways of building CI/CD pipelines, setting up and using monitoring tools, building environments, orchestrating containers using Kubernetes. I believe that this course will help me to obtain some of the mentioned skills.

## Skills

### .NET Core:

C#, EF Core, ASP.NET Core, SignalR, HangFire + Cron.

### Containerization:

Docker.

### Databases:

MongoDB, PostgreSQL, SQL Server.

### Messaging:

RabbitMQ.

### Front-End:

TypeScript, JavaScript, Angular, Vue.

### Other technical skills:

Design patterns and antipatterns, Algorithms, Data Structures, Indexing, Dependency Injection, Concurrent Programming.

### Soft skills:

Communication, Problem Solving, Analytical thinking, Willingness to learn, Time Management.

## Languages

### English

Full Working Proficiency

### Ukrainian

Native

## Education and courses

### Bachelor's in Software Engineering

**Kyiv Polytechnic University**

09.2020 - now

### Summer Academy 2022

**Binary Studio Academy**

05.2022 - 09.2022

## Employment

### Junior .NET Developer

**Infopulse**

07.2022 - now

#### Responsibilities:

- Finding, discussing and implementation of the best-under-circumstances solutions to the posed problems.
- Implementation of new features or redesign of the existing ones.
- Bug fixing.
- Collaboration with teammates.
- Taking part in estimation of tasks.

#### Achievements:

- Have discovered a better way to feed data to widgets.
- Have adapted the whole system to work with operations, that affect multiple files at once.
- Had discovered an alternative way to apply database scripts, which have later been adopted as the main one of the project.

### Trainee .NET Developer

**Infopulse**

03.2022 - 06.2022

#### Responsibilities:

- Finding, discussing and implementation of solutions to tasks, selected by mentor.
- Collaboration with teammates.
- Learning new tools and technologies fast.

#### Achievements

- Have received a unanimous vote about successful passage of a trainee program.

## Projects

### UNDER NDA

**Infopulse**

03.2022 - now

#### About the project:

The project is a Know-Your-Customer platform, adapted for more than a dozen different customers. It provides customers with multiple workflows for clients' identification as well as tools for requesting from specific providers, processing, storing and visualizing legal data about 3rd-party entities.

#### Technologies, that I have worked with:

**Back-End** .NET Core, RabbitMQ, MongoDB, HangFire + Cron.

**Front-End** TypeScript, Vue3.

**Deployment and Monitoring** Docker, Grafana, Portainer.

**Project Management** Azure DevOps.

### Tasque

**Binary Studio Academy**

07.2022 - 09.2022

#### About the project:

Tasque is a task-tracking system that provides an easy and convenient way of management a development of small and medium-sized projects.

#### Technologies, that I have worked with:

**Back-End** .NET Core, RabbitMQ, PostgreSQL, SignalR.

**Front-End** Angular, RxJS, TypeScript.

**Deployment and Monitoring** Docker.

**Project Management** GitHub.
